Summary

I'm passionate about technology, programming and looking for the best solution to every task I tackle. I like to try and learn new things constantly, even better if there is chance to share that process with an awesome team.

I enjoy programming, I like building things that are useful and also accelerate my team's workflow whenever possible.

My main language has been Java since I started programming, but I'm always immersing myself in talks, tutorials, courses of all kinds of other languages, Scala, Python, JavaScript, Rust, Clojure, Elm, Elixir, etc. Each has its flaws and strengths, they should all be tools in our toolbox not dogmas we should follow religiously.

Experience

Java Application Developer

Ualá

Jul 2020 - Present (4 months +)

Freelance Web Developer

Freelance

May 2019 - Present (1 year 6 months +)

As a freelance developer, I specialize in PHP/MySQL using the Laravel framework to build scalable and dynamic web applications.

Application Development Analyst

Accenture Argentina

Jun 2019 - Jul 2020 (1 year 2 months)

Project: Digital transformation for one of the biggest banks in Argentina. Focusing on a platform with a microservices-oriented architecture.

Description: As a backend developer my duty is to develop, test and deploy the services required by the business analysts, using good coding practices and sharing the knowledge with new members of the team. Good communication skills are key, since every team depends on each other's services.

Technologies: Java 8, Spring Boot, Apache Camel, Openshift, ActiveMQ, CXF, MongoDB, Oracle, REST, TDD, SOLID, Junit, Mockito, Karate.
